

Pattern for Pipos Baha Cat's trousers

This pattern is for the trousers shown in the picture on the left. The right one shows slightly wider trousers made by widening the lower part of the pattern. The upper part is exactly the same. You can easily modify the inseam to achieve different results. If you use very stretchy fabric, you could make the trouser legs narrower.

The gold colored trousers are baggy, because there is elastic string on the waist. The black and white ones have a snap on the back.

For instructions on sewing these trousers, go to <http://tarjascrafts.blogspot.com> and select category Baha Cat.
