

Monster High doll's boots

Boots on Draculaura

These instructions were made for printing on A4 size paper, but you should get correct result on Letter size paper also, if you do not resize the pages during printing (there should be a resize option somewhere in the Print dialog, make sure it is not selected).

Pattern

Below are the patterns for upper and sole. The uppers are identical. Flip the sole pattern to cut the pieces for the left foot.

Instructions

1.

Cut the uppers, fold them the right side inside and sew the back seams. You may have to adjust the position of the seam, depending on how stretchy fabric you are using and how tight you want the boots to be. Turn the uppers, so the right side is outside.

Cut 2 right soles from cardboard and glue them together, using the doll's foot to get the correct shape. Repeat with the left sole. Cut the leather insoles and glue on top of the cardboard soles.

2.

Put the uppers on the doll's feet. Put the soles in place and glue the edges of the uppers under the soles, trimming away any extra fabric. Pull the fabric tight while gluing, but make sure you do not stretch it (it needs to be able to stretch when you put the boots on the dolls feet).

3.

Make the heels out of wood or other suitable material. The photo shows just one option. If you use wood, you can saw the upper part of the heel to 45 degree angle using a mitre box.

4.

Use the same fabric to cover the heels. The fabric will be easier to handle, if you treat it with sealer before doing this (it won't stretch and the glue won't seep through).

5.

Glue pieces of leather on the bottom of the heels. Glue the heels in place. Glue pieces of leather as outer soles (use the sole pattern to cut these).
