

Shoes for Tiny Betsy McCall

This model is very simple. It requires minimum amount of glueing. The inner sole is made of the same fabric as the upper part. The outer sole is made of leather.

As the shoe has open toe, it is easy to glue. All you need to glue are the sides under the inner sole, the strap behind the ankle, and finally the outer sole. You can also glue a small piece of leather as the heel of the shoe.

You can use fairly thick fabrics for this model as the sides are straight, which makes it easy to glue them.

This model is also easy to scale for other dolls with flat feet.
